Fromagerie Tournevent's **BIQUET**  
takes 1st prize for the 5th time  
at  
The American Cheese Society Conference National  
Judging  
Louisville, KY

Fromagerie Tournevent of Chesterville, Quebec, Canada won 2 major awards for its goat cheeses at the annual American Cheese Society's National Specialty Cheese Contest held in Louisville, KY on July 23, 2005.

**1st prize**                      **Biquet**  
Category:                      Fresh Goats Milk Cheeses

**3rd prize**                      **Chèvre Noir**  
Category:                      Goat's Milk Cheddar under  
12 months

Absolutely fantastic and a solid recognition for consistent excellence and quality, Tournevent's **Biquet** was honored for the 5th time in 9 years with a 1st prize by this prestigious North American specialty cheese contest (1996, 1997, 2002, 2004 & 2005). Since this category is the most coveted among goat cheesemakers, Tournevent is especially proud of this award.

Tournevent's **Chèvre Noir**, a 12 month aged, firm ripened goat cheese was also honored again for its unique flavor profile (ACS 1st : 1999, 2000). This fine cheddar type wrapped in its characteristic black wax has won numerous awards in North America and in Europe over the last 15 years. It is Tournevent's most famous signature goat cheese.

Over 740 specialty cheeses, all produced by North American specialty cheese manufacturers were put to the test by 20 professional judges coming from different sectors of the specialty cheese industry - from retailers to dairy technicians. All larger producers, as well as farmstead goat cheese-makers were represented at this once a year, unique competition.

Unlike other competitions where cheeses are judged on their technical merits only, the American Cheese Society's goal is to give positive recognition to those cheeses which are of the highest quality in all aspects - flavor, aroma, texture, aesthetics as well as technical evaluations.

These awards will permit Fromagerie Tournevent to continue its successful expansion into the American and Canadian gourmet cheese markets and consolidates Tournevent's reputation as a consistent premium goat cheese producer.

We are most happy to share this good news with you, as it confirms the consistent high quality of Tournevent goat cheeses that our ever growing clientele has so come to appreciate.

## Three Sisters Wins National Award

Truly an American Original- Three Sisters Farmstead Cheese proudly announces a First Place victory in the American Originals category at the prestigious American Cheese Society competition in Louisville, Kentucky. Bella Sorella, now called "Serenita", was voted the best American Original Cheese in the U.S. The ACS judging is the world's largest and most influential competition for American-made specialty cheeses, with 749 cheeses entered in this year's fierce competition. The cheeses chosen for awards are of the highest quality in all aspects - flavor, aroma and texture as well as technical excellence. Cheesemaker Marisa Simoes introduced Serenita in February 2005 describing it as "the younger, creamier version of the original award-winning Serena. Serenita is made by not cooking the curd, and is similar to Fontina or Beaufort in consistency, but with an earthier, nuttier flavor." Unlike any cheeses in the world, Serena and its little sister Serenita are truly American Originals.

It's The Cheesemaker- Three Sisters Farmstead Cheese is one of only a handful of California's true farmstead cheesemakers, using milk from their own herd for their handmade cheeses. But it's the cheesemaker that makes this company truly unique. Marisa Simoes, the 25-year-old cheesemaker and owner, has been the inventor and driving force behind Three Sisters since she was 19. Daughter of a multi-generational dairy family with roots in Holland, Marisa developed the cheeses using milk from Hilarides Dairy, her father's herd of Jersey cows. Their farm and creamery are nestled in the shadow of the Sierra Nevada mountains in California's Central Valley and include a visitor's center and retail shop open to the public.

#### **Cocina Selecta Additions:**

#### **370316 Capers Nonpareilles 6/16 oz**

These capers are from the Mediterrean Region-Northern Morocco / Turkey. Capers are the smallest of the commercially used capers. They are brownish green. The caper is the flower bud of a low growing vine found in Mediterranean countries. It is cured in brine and packed in vinegar. Capers are now being used in a wide variety of dishes, from the traditional Greek, Spanish and Italian cuisines to more American dishes such as meatloaf or tuna fish salads.

#### **370305 Caperberries 6/16 oz**

These caperberries are from the Mediterrean Region-Northern Morocco / Turkey. Caperberries are a relative of capers, they are much larger and have a more delicate taste. Caperberries are the spicy flowers of the caper bush (from the cabbage family). They are hand picked in the large bud stage and then pickled. Caperberries are great for all sorts of seafood dishes and preparations, absolutely fabulous with smoked salmon, and an interesting and flavorful garnish to salads. They brighten soups, stews, pastas and more. Caperberries offer a less intense flavor of the traditional caper.

# Wild & Unique Foods by Tim Doyle

Connoisseurs from around the world know that in the lush countryside of Northern Germany, tucked between the North and Baltic Seas lies the ideal climate where Abraham Hams are made. Historically, the farmers in this region built farm houses with high thatched roofs as protection for their families against the cold blustery winds of fall and winter. When the cold weather began, the farmers would hang their hams from these roofs high above the fireplace so that the rising smoke could preserve the meat. All of these farms remain far from the cities and industrial centers.

Although modern techniques are being used in today's production they are still modeled after this age old tradition. Abraham uses only the finest meats for its products and applies techniques and methods developed over the last century. The tenderness of the Westphalian Ham results from the dry curing and careful cold smoked Artisan process with beech wood chips. During the lengthy curing and ripening process, under the watchful eye of a curing Master, Abraham Westphalian Ham picks up its mild savory flavor. The hams are aged for up to 6 months.

It is this careful attention to production that guarantees the quality of this lean deboned ham. Abraham's Westphalian Ham has an excellent yield with minimal loss through slicing. Slice it thin to enjoy this exquisite taste like no other.
